Occupational Health Practice

Edited by R. S. F. Schilling
MD, DSc, FRCP, DPH, DIH

This book describes what the physician, the hygienist and the nurse can do to protect and improve the health of people at work. It is a comprehensive, up-to-date account of occupational health practice, with some emphasis on the special needs of working people in developing countries. Three introductory chapters discuss in general terms occupational health practices and the issues to which they can be addressed at a national level. Then there are chapters describing in greater detail the main functions of an occupational health service, including sections on epidemiology and field surveys.

The book is written primarily for postgraduate students in occupational medicine or nursing, but will be of value to medical and non-medical students in related fields such as social work, psychiatry and psychology.

Pneumoconiosis Abstracts Volumes I to III

(covering the years 1926–1955)

The set of 3 volumes contains a comprehensive collection of abstracts of important papers published in this field over a period of 30 years. In addition to abstracts on the various forms of pneumoconiosis, abstracts of articles are included which deal with:

standards of air dustiness;
concentrations of dust from various processes;
technical methods of measurement of dust;
physical properties of dusts and their chemical and mineralogical characters.

Continuity from 1956 is maintained by the Occupational Hygiene section of the *Bulletin of Hygiene* and *Abstracts of Hygiene.*

Prices of single volumes in the set are:

Vol. I	1926–1938	319 pp.	£3.
Vol. II	1939–1950	480 pp.	£4.
Vol. III	1951–1955	355 pp.	£3.

SPECIAL OFFER

A limited number of sets of Volumes I to III is available at a special offer price of £6 (U.S. $15.00) per set, post free.

Orders, with remittance, should be sent to

Pneumoconiosis Abstracts Volumes I to III

(covering the years 1926–1955)

The set of 3 volumes contains a comprehensive collection of abstracts of important papers published in this field over a period of 30 years. In addition to abstracts on the various forms of pneumoconiosis, abstracts of articles are included which deal with:

standards of air dustiness;
concentrations of dust from various processes;
technical methods of measurement of dust;
physical properties of dusts and their chemical and mineralogical characters.

Continuity from 1956 has been maintained in the *Bulletin of Hygiene* and Environmental Health section of *Abstracts on Hygiene*.

Prices of single volumes in the set are:

Vol. I	1926–1938	319 pp.	£3.
Vol. II	1939–1950	480 pp.	£4.
Vol. III	1951–1955	355 pp.	£3.

SPECIAL OFFER

A limited number of sets of Volumes I to III is available at a special offer price of £6 (U.S. $15.00) per set, post free.

Orders, with remittance, should be sent to
